

VISTA M22 AMPLIFIER WITH CLEARLINE™ AUDIO TECHNOLOGY

A VoIP-ready, hands-free office solution

Designed for telephone professionals using either traditional or new wideband VoIP phone systems, the Vista M22 amplifier delivers precise levels of listening comfort, sophisticated hearing protection, and superior audio performance. It is compatible with most office phones* and offers new Clearline audio technology to enhance speech clarity—which helps to reduce repeats, errors, and listening fatigue. The Vista M22 is easy to use, with one-button headset/handset selection, plus controls for both incoming and outgoing volume.

The Vista M22 adds value in traditional PBX systems, standard VoIP systems, and new wideband VoIP systems, protecting your investment through future tele-communications system upgrades.

The Vista M22 features Clearline audio technology, designed to improve a range of important factors that can significantly affect call quality:

- **Wideband audio.** When used as a part of a wideband VoIP system, the Vista M22 delivers enhanced audio and more natural speech—reducing repeats, errors, and listener fatigue.
- **Loud noise protection.** Reduces the level of incoming loud noises, such as fax tones or whistle blasts to a more comfortable listening level.
- **Advanced echo management.** Helps reduce echo often associated with VoIP telephony.
- **Background noise reduction.** Reduces the level of background noise picked up by the headset microphone and also reduces the level of noise on the incoming signal to improve call quality.
- **Call volume equalizer.** Maintains user-selectable listening preferences no matter the quality of the incoming call.

*Not available for dial-in-handset or cordless telephones.

Vista M22 Key Features

Compatibility	Most office phones
Battery Type	2 AA Batteries (included)
Cord Length	10 foot coiled cable to Quick Disconnect™
Headset Controls	Volume, Mute, Headset/Handset Select
Call Volume Equalizer	Yes
Wideband Support	Yes

Sound Innovation for missions to the moon. And for everyday life on this planet, too.

In 1969, a Plantronics headset carried the historic first words from the moon: "That's one small step for man, one giant leap for mankind." Today, we're the headset of choice in mission-critical applications such as air traffic control and 911 dispatch. This history of proven sound innovation is the basis for every product we build—whether it's for work, for home or on the go.
